CAREER OBJECTIVE

Enthusiastic MCA graduate with a strong passion for development using Java and modern web technologies. Equipped with hands-on experience in building end-to-end web applications through academic projects, covering Spring Boot backend APIs, React JS frontend, and MySQL database design. A quick learner who is eager to contribute to a dynamic development team, write clean and maintainable code, and grow into a well-rounded Software engineer.

TECHNICAL SKILLS

Backend	Java, Spring Boot, Spring MVC, Spring Security, Node.js, REST APIs,
Frontend	React JS, JavaScript, HTML, Tailwind CSS
Database	MySQL, MongoDB
Dev Tools	IntelliJ IDEA, Visual Studio Code, Git & GitHub, Maven
Familiar	STLC, Microservices, Manual & Automate Testing, JIRA, Cloud Computing,

PROJECTS

Restaurant Management System

Express.js | Node.js | React JS | MongoDB | REST API

- Developed a full-stack Restaurant Management System using the MERN stack for managing menu items, orders, users, and payments.
- Designed responsive and user-friendly interfaces using React.js and modern UI components for seamless user experience Built.
- Built RESTful APIs using Node.js and Express.js for authentication, order handling, menu management, and customer operations.
- Integrated MongoDB database for storing restaurant, customer, and order-related data with efficient CRUD functionality.
- Delivered end-to-end user workflows covering login, search, add-to-cart, checkout, and order tracking.
- Performed debugging, API testing, and validation to ensure smooth application performance and data accuracy.

E-Commerce Platform

Java | Spring Framework | React JS | MySQL | REST API

- Built a complete e-commerce platform covering product listing, user registration, cart, order management, and payment — end-to-end.
- Implemented server-side logic in Java with Spring Framework; structured REST APIs for seamless communication with the React frontend.
- Designed a relational MySQL schema with foreign key constraints for products, users, orders, and transactions to ensure data integrity.
- Integrated React JS with backend APIs using Axios; built responsive pages for product catalogue, order history, and user profile.
- Added input validation and basic session-based authentication to improve application security and user experience.
- Validated API endpoints via Postman; documented test cases for functional and integration scenarios.

EDUCATION

Master of Computer Application (MCA)

Aug 2024 – May 2026

Alard University, Pune

- Graduated 2026 | Coursework: Software Engineering, Advanced Java, Data Structure, Software Testing & Debugging, Computer Network & Operating System.

Bachelor of Computer Application (BCA)

Aug 2021 – Apr 2024

Veer Narmad South Gujarat University

- CGPA: 7.06 / 10 | Coursework: OOP Concepts, DBMS, RDBMS, Programming Fundamentals, Linux, Cloud Computing, Software Foundations.

KEY STRENGTHS

- Strong grasp of classes, inheritance, interfaces & design patterns
- Building RESTful backends with layered MVC architecture
- Component-based UI development with hooks & state management
- Designing, building & testing clean, well-structured APIs
- Fresher - Wiling to relocate, and Available to Join immediately.
